🧠 UMIEJĘTNOŚCI

Cloud: AWS (EC2, S3, IAM, Lambda, CloudWatch)

Containers: Docker, Kubernetes, Helm

IaC: Terraform

CI/CD: GitHub Actions, Jenkins

Scripting: Bash, Python

OS: Linux (Ubuntu, Amazon Linux)

📁 PROJECTS

AWS Infrastructure Automation – built AWS VPC, EC2, S3, and RDS using Terraform.

CI/CD Pipeline – implemented GitHub Actions workflow for automated deployment.

Containerized App – deployed microservices on AWS EKS using Helm, with monitoring via Prometheus and Grafana.

📄 PODSUMOWANIE

Ambitious and detail-oriented Junior DevOps Engineer with hands-on experience in AWS, IaC, and automation. Open to B2B cooperation. Focused on building scalable cloud infrastructure, CI/CD pipelines, and containerized environments.

Looking for the first commercial role to apply my knowledge and grow in a dynamic DevOps team.
